PRAGATISHVAR A

AI & ML Enthusiast | Cybersecurity Enthusiast
praga.jv@gmail.com | 6379024459 | Linkedin | Github

PROFESSIONAL SUMMARY

Motivated Computer Science student with a keen interest in Artificial Intelligence, Machine Learning, and Cybersecurity. Passionate about developing practical solutions using Python while strengthening technical expertise through hands-on projects and continuous learning. Seeking opportunities to contribute, grow, and create meaningful impact in technology-driven organizations.

EDUCATION

B.E. Computer Science and Engineering **2023-2027**
Kongunadu College of Engineering and Technology, Trichy
CGPA: 7.4

HSC (12th Grade) **2023**
Dharani International School, Vasudevanallur
Percentage: 67%

TECHNICAL SKILLS

Programming Languages	**:** Python, Java
AI & ML Concepts	**:** Pandas, NumPy, Scikit-learn, PyTorch
Core Concepts	**:** Object-Oriented Programming (OOP), Computer Networks , Operating System, Cybersecurity Fundamentals
Database	**:** DBMS (Basic), MongoDB Atlas, SQL
Web Technologies	**:** HTML, CSS
Tools & Platforms	**:** Git, GitHub, VS Code, Postman, Cisco Packet Tracer, Linux, Kaggle

PROJECTS

AI POWERED USER MONITORING & ANOMALY DETECTION TOOL
GitHub Repo
Role: Backend Developer
Tech Stack: Python, Flask, MongoDB Atlas, psutil, Chart.js, Ngrok API, Gmail SMTP
Description:

- Developed an AI-powered user activity monitoring system using Python, Flask, and the Isolation Forest algorithm to detect anomalous user behavior.
- Built RESTful APIs and integrated MongoDB Atlas for secure storage of activity logs, enabling real-time monitoring and automated email alerts.
- Implemented system activity tracking using psutil and created an interactive dashboard with Chart.js for effective visualization and security monitoring.

FLOOD MAPPING FROM SATELLITE IMAGERY USING DEEP LEARNING
Github Repo
Role: Team Leader & ML Developer
Tech Stack: Python, PyTorch, UNet++, ResNet-34, Rasterio, Albumentations, NumPy, Pandas

- Developed a deep learning-based flood mapping solution using satellite imagery and geospatial data for automated flood segmentation.
- Designed an end-to-end machine learning pipeline involving data preprocessing, feature engineering, model training, and performance evaluation.
- Leveraged UNet++ with a ResNet-34 encoder, along with Rasterio and Albumentations, to improve segmentation accuracy and model performance

CERTIFICATIONS

- **CCNA: Introduction to Networks** | Cisco Networking Academy — Feb 2026
- **Career Essentials in Generative AI** | Microsoft and LinkedIn — April 2025
- **Introduction to Cybersecurity** | Cisco Networking Academy — June 2025
- **Artificial Intelligence Fundamentals** | IBM SkillsBuild — July 2025
- **AWS Cloud Practitioner Essentials** | AWS Training & Certification — July 2025

EXPERIENCE

AI & ML Intern | Edunet Foundation (IBM SkillsBuild)
6 Weeks | Remote

- Completed a 6-week Artificial Intelligence & Machine Learning internship through Edunet Foundation in collaboration with IBM SkillsBuild, gaining hands-on experience in ML workflows.
- Developed an Employee Salary Prediction System using Python, LightGBM, Pandas, and Scikit-learn to build and evaluate predictive models.
- Applied data preprocessing, feature engineering, model training, and performance evaluation techniques to improve model accuracy and optimize predictions.

ACHIEVEMENTS

- Ranked among the Top 10 teams in the AISE–ANRF Flood Mapping Challenge, organized in collaboration with IBM& IIT Delhi held at IIIT Hyderabad, for developing a deep learning-based flood mapping solution.
- Selected among the Top 50 teams out of 1,300+ participants in the IISF Science & Technology Hackathon & developed Marine Biodiversity Intelligence System
- Secured 2nd Prize among 120+ participants in a National-Level Photography Competition at K.S.R. College of Engineering, received cash award
